

“By actively seeking to not lose big, we believe that investors will be better off in the long run.”

– RANDY SWAN, CEO AND LEAD PORTFOLIO MANAGER

Opportunities in Foreign Developed Equities

We believe foreign developed markets equities can serve various roles in a portfolio, and investors have many reasons to be excited about foreign markets:

- Higher upside potential
- Exposure to other growing economies
- Significant share of global GDP
- Diversification of global allocations

The Trouble with ‘Buy and Hold’

Seeking portfolio growth through foreign developed equities may expose investors to a volatile ride with unpredictable periods of severe losses along the way, as shown in the table on the right.

Periods of severe losses can trigger emotional reactions—many ‘buy and hold’ investors struggle to hold on when losing money, leading them to ‘buy and fold’.

Therefore, we seek to help investors hold on by avoiding big losses with our distinct long-term hedge.

Did you know?

When losses in foreign markets occur, they can be severe. Largest drawdowns for MSCI EAFE since inception*:

<u>Max Drawdown</u>	<u>Beginning</u>	<u>Ending</u>
-57.38%	Nov - 2007	Jun - 2014
-48.22%	Jan - 2000	Sep - 2005
-41.53%	Apr - 1973	Sep - 1974
-31.21%	Jan - 1990	Jan - 1994
-23.01%	Jan - 2020	Nov - 2020

*Source: Swan Global Investments and Zephyr StyleADVISOR. Max monthly drawdowns for the MSCI EAFE Index from January 1970 through December 2021. Past performance is no guarantee of future results.

Long-Term Hedge for Long-Term Investing

For long-term investors there are distinct benefits to using a long-term hedge.

Seeking Defense

A hedge is a way to mitigate undiversifiable market risk.

Reduce Emotional Reactions

Seek to help investors avoid big losses and emotional reactions.

A Long-Term Hedge

A hedge that may last throughout long bear markets.

May Acquire More Equity

During a selloff, the LEAPS gain value and may be sold to potentially buy more equity at a low.

The Defined Risk Strategy - Investing Redefined®

Launched in 1997, the Defined Risk Strategy is a distinct and proven goals-based approach that seeks to generate consistent long-term returns by actively seeking to not lose big.

Always Invested We believe that markets tend to go up over time, so we remain always invested.

Always Hedged We also believe severe losses can derail investors from their goals, so we remain always hedged.

A HEDGE IS NOT INSURANCE AGAINST LOSSES

Defining Risk to Seek Improved Outcomes—That's Investing Redefined®.

Defined Risk Strategy seeks to redefine long-term investing by passively investing for growth while actively seeking to minimize the impacts of bear markets. This may result in a less volatile investor experience and more consistent long-term results.

Investment Process

When the market drops and the equity loses value, the put option increases in value and vice versa.

A HEDGE IS NOT INSURANCE AGAINST LOSSES

Swan Defined Risk Foreign Fund

Class I: **SDJIX** | Class A: **SDJAX** | Class C: **SDJCX**

Based on the Defined Risk Strategy, this fund seeks income and growth of capital to help investors achieve positive returns while mitigating downside risk and volatility in foreign developed markets. The Fund invests in low-cost ETFs that track foreign developed markets.

Important Risk Information and Disclosures: Swan Global Investments, LLC is a SEC registered Investment Advisor that specializes in managing money using the proprietary Defined Risk Strategy ("DRS"). SEC registration does not denote any special training or qualification conferred by the SEC. Mutual Funds involve risk, including possible loss of principal. ETFs are subject to investment advisory and other expenses, which will be indirectly paid by the Fund. As a result, the cost of investing in the Fund will be higher than the cost of investing directly in ETFs and may be higher than other mutual funds that invest directly in stocks. ETFs are subject to specific risks, depending on the nature of the fund. Investments in underlying funds that own small and mid-capitalization companies may be more vulnerable than larger, more established organizations. Investments in foreign securities could subject the Fund to greater risks including, currency fluctuation, economic conditions, and different governmental and accounting standards.

The use of leverage, such as that embedded in options, could magnify the Fund's gains or losses. Written option positions expose the Fund to potential losses many times the option premium received. A Put Option is an option contract giving the owner the right, but not the obligation, to sell a specified security at a specified price within a specified time. A Call Option is an option contract giving the owner the buy, but not the obligation, to sell a specified security at a specified price within a specified time. The adviser's dependence on its DRS process and judgments about the attractiveness, value and potential appreciation of particular ETFs and options in which the Fund invests or writes may prove to be incorrect and may not produce the desired results. Purchased put options may expire worthless and may have imperfect correlation to the value of the Fund's sector ETFs. Written call and put options may limit the Fund's participation in equity market gains and may amplify losses in market declines. The Fund's losses are potentially large in a written put or call transaction. If un-hedged, written calls expose the Fund to potentially unlimited losses. The effectiveness of the hedge and degree of downside risk mitigation varies with market conditions. The DRS can and does have periods of losses.

The benchmarks used for the Fund is the MSCI Emerging Markets Index, which is designed to measure the equity market performance in global emerging markets. An investment cannot be made directly in an index. Indexes are unmanaged and have no fees or expenses.

Investors should carefully consider the investment objective, risks, charges and expenses of the Swan Defined Risk Foreign Developed Fund. This and other information is contained in the prospectus and should be read carefully before investing. For a prospectus please call (877) 896-2590. The Fund is distributed by Northern Lights Distributors, LLC, member FINRA/SIPC. Northern Lights Distributors, LLC and Swan Capital Management, LLC are not affiliated. There is no guarantee the fund will meet its objective. 6498-NLD-06/07/2019
